### **Massage for Motor Vehicles Accidents**

At Sachi Wellness Center, our Massage Therapist offer Motor Vehicle Recovery Massage. Following a car accident massage therapy can aid in the recovery of muscles exposed to injury and trauma. Massage can bring immediate relief, reduce inflammation and increase range of motion. Usually a series of treatment massages are prescribed for healing to allow the injured muscles to return to normal. We are able to bill auto insurance companies for massage therapy for our clients. We do the billing and you will have no out of pocket expenses. A prescription or referral from a primary care physician (MD), chiropractor (DC) or Naturopathic Physician (ND) is all that is required for PIP from your auto insurance to cover massage therapy. Prior to scheduling your massage, you must consult with your doctor to evaluate your condition.
